Summary

Competitive programmer (LeetCode Guardian, Top 0.62% globally) and full-stack engineer with experience building scalable backend systems, APIs, and database-driven applications using Node.js, NestJS, Angular, and Next.js.

Work Experience

SDE Intern | RxMen

April 2026 – Present (*Delhi*)

- Architected an end-to-end CRM telephony platform integrating CallerDesk Click-to-Call APIs and asynchronous webhook processing, supporting 140+ daily calls with real-time status synchronization, cloud recording playback, and follow-up scheduling.
- Led a large-scale backend refactoring by centralizing shared services, utilities, and 33 database entities into a common module, modifying 288+ files across 2 repositories to establish a single source of truth and improve maintainability.
- Shipped a full-stack patient-doctor communication platform across API, admin, and patient applications, enabling 100+ daily active users and 150+ doctors to exchange queries and documents through automated routing and WhatsApp notification workflows.

Full Stack Intern | Mercato Agency

May 2025 – July 2025 (*Remote*)

- Identified and resolved 10+ API response inconsistencies across 3 dashboards, improving dashboard data accuracy by 60%.
- Debugged and optimized API integrations across frontend and backend systems, reducing data synchronization failures by 75% and improving production reliability.

Projects

QuickAI – Full Stack AI SaaS Platform (React, Node.js, PostgreSQL, Clerk, OpenAI)

LIVE

[Source Code](#)

- Built a PERN-based AI SaaS platform with 6+ tools including content generation, image generation, and resume analysis, used by 100+ users with Redis caching reducing OpenAI API response latency.
- Architected role-based access control with subscription-based feature gating across 3 user tiers, optimizing PostgreSQL schema and indexing strategy to reduce query latency by 40% under concurrent load.

Job Portal Fullstack (React.js, Node.js, Express.js, MongoDB, Clerk Authentication)

LIVE

[Source Code](#)

- Engineered a full-stack job marketplace with normalized MongoDB schema supporting recruiter and candidate roles, designing separate data models for jobs, applications, and user profiles to handle complex relational queries efficiently.
- Integrated Sentry for real-time error monitoring with source maps, reducing mean time to debug production failures and ensuring reliable dashboard behavior across core hiring workflows.

Customer Churn Prediction System (Python, Scikit-learn, XGBoost, FastAPI, Streamlit)

LIVE

[Source Code](#)

- Developed a churn prediction model on 7,000+ telecom records with feature engineering and preprocessing, achieving 91% overall accuracy.
- Built a FastAPI backend serving real-time and batch predictions with sub-200ms average response time.

Scholastic and Co-Scholastic Achievements

- LeetCode** (Guardian, 2150+ rating, Top 0.62% globally), **Codeforces** (Expert, 1700+ rating), and **CodeChef** (4 Star, 1850+ rating).
- Meta Hacker Cup 2025:** Secured a **global rank of 729** in Round 2 among 5,000+ participants in Meta's annual competitive programming championship.

Technical Skills

Programming Languages: C, C++, Python, JavaScript, TypeScript

Web & Backend Development: Node.js, Express.js, FastAPI, Angular, React.js, Next.js, REST APIs, HTML5, CSS3

Databases: PostgreSQL, MongoDB, MySQL, Redis

AI & ML Tools: Gemini API, OpenAI API, Scikit-learn, XGBoost

ML/DS Libraries: Pandas, NumPy, Matplotlib

Core Concepts: System Design, OOP, API Design, Database Design, MVC Architecture

Education

Graphic Era Hill University, Dehradun

2022 – 2026

B.Tech in Computer Science and Engineering

CGPA: 7.0/10

Bhartiya Vidyapeeth, Agra

2022

12th CBSE

80.5 %

Bhartiya Vidyapeeth, Agra

2020

10th CBSE

80.1 %
